

Electronics Disposal Ban

New Hampshire state law prohibits the disposal of many electronics in the regular trash.

Banned items include any device with a video display, a video recorder/player, or a digital hard drive. If not properly handled, these items can become a major source of lead, cadmium and mercury contamination in the environment.

Common items that are banned are:

- Televisions
- Computers
- Monitors
- VCRs

Manchester residents and businesses may dispose of these and other electronic items at the [Drop Off Facility](#). Fees apply.

Thank you for doing your part to protect human health and environmental resources!
